

## Patients in Jupiter enjoy benefits of same day restorations with CEREC technology

CEREC is advanced dental restoration technology based upon computer-aided design and manufacturing software and equipment. It stands for CERamic REConstruction, or Chairside Economical Restoration of Esthetic Ceramics. Developed in 1980 at the University of Zurich, CEREC is the only technology that provides same day porcelain crowns, fillings, inlays, and onlays.

At Burman Dental, LLC, serving Jupiter, Juno Beach, Tequesta, Palm Gardens, and surrounding areas, Dr. Steven A. Burman and his colleagues are highly skilled and experienced in all aspects of dentistry. Dr. Burman, a doctor of dental medicine (DMD), has been helping patients "love their smiles" for more than 20 years and has always been progressive with regard to advanced dental technology.

Every patient is unique. After a comprehensive consultation, Dr. Burman works with his patients to design a custom-tailored treatment plan to meet individual lifestyle, personal smile goals, and oral health needs. At Burman Dental, our CEREC procedures use porcelain because it has the same light-reflecting characteristics and temperature reactivity as natural tooth enamel, is stain resistant and durable. CEREC technology allows patients to receive same day cosmetic restorations, including:

### Porcelain crowns

A dental crown is an ideal solution for patients who have teeth that are damaged, cracked, decaying, broken, or worn. Also called a "cap," the crown covers the affected tooth and provides protection and stability.

### Porcelain fillings

Burman Dental offers both composite, tooth colored fillings and porcelain fillings for natural-looking solutions to cavities, however, porcelain fillings, are stronger and ideal for larger fillings.

### Porcelain inlays and onlays

These restorations are an option when a tooth requires more protection and coverage than just a filling, but not quite as much as a crown. Inlays and onlays are referred to as partial crowns, strengthening and preserving part of a tooth.

For any of the same day restorations, no messy impression is needed; instead, comfortable digital imaging movies are taken with an oral camera and then the image is processed by the

design software and a precision milling tool carves the porcelain to its desired shape and structure.

For extensive cosmetic restorations, such as a full smile makeover, implants, veneers, bridges, and dentures are available at Burman Dental, L.L.C., to restore one's smile.

CEREC technology, combined with a relaxing environment, allows the Burman Dental team to serve patients with utmost comfort and convenience.

For more information about same day restorations or cosmetic dentistry options, call Burman Dental, L.L.C., at **561-404-4325** today. The office is located at 224 Chimney Corner Lane, Suite 3022, Jupiter, FL 33458.
